

# TurboVentura

## Wind Driven Turbine Ventilator

TurboVentura is a roof mounted, wind driven turbine ventilator. With a 150mm opening, it is ideal for ventilating smaller areas, such as sheds or garages.

- ✓ **HEAT REDUCTION**  
Removes heat and replaces it with outside air without the use of electricity.
- ✓ **CONDENSATION MANAGEMENT**  
Reduce the risk of condensation-related damage to your home.
- ✓ **PEACE OF MIND**  
Australian-made & comes with a 15-year warranty.

## Why Ventilate?

Effective ventilation is an important way to create a more comfortable and energy efficient space. Removing the heat in summer and reducing the risk of mould in winter will help keep your property safe from these types of damage.

### Heat Reduction

Removes heat and replaces with outside air

### Energy Efficient

Helps reduce the load on air conditioning

### Moisture Management

Reduce the risk of moisture-related damage to your space

### Improve Air Quality

Replaces stale and polluted air with outside air

## Protect Your Shed with Bradford Polyair<sup>™</sup>

Polyair is a range of thermo reflective insulation products that reduces radiant heat gain in your shed's roof and walls.

When correctly installed and sealed, Polyair also provides additional protection against heavy rain, strong winds or hail, while also minimising the amount of dust that can enter your shed, helping prevent damage to valuables.

- **Special antiglare coated outward facing foil that reflects the sun's radiant heat**
- **Stay cooler in summer & warmer in winter**
- **Easy to install for a quality finish**
